PROFESSIONAL SUMMARY

Detail-oriented **Backend Developer** with strong knowledge of PHP, MySQL, and server-side application development. Experienced in building secure authentication systems, REST APIs, database-driven web applications, and admin dashboards. Passionate about writing clean, scalable backend code and solving real-world problems.

TECHNICAL SKILLS

Backend

- PHP (Core PHP)
- MySQL
- REST API Development
- Authentication & Authorization
- Session & Cookie Handling
- Password Hashing & OTP Verification

Frontend (Support)

- HTML5, CSS3, JavaScript
- Bootstrap, Tailwind CSS

Tools & Technologies

- Git & GitHub
- XAMPP
- phpMyAdmin

- MVC Basics
 - JSON & AJAX
-

EDUCATION

Bachelor of Science (BSc) – Computer Science

Second Year (Pursuing)

College / University Name

2023 – Present

PROJECTS

SkillSyncPro – Job Matching Platform

Tech: PHP, MySQL, HTML, CSS, JavaScript

- Developed backend logic for user & company authentication
 - Implemented resume upload and skill-matching system
 - Created admin panel for job posting and management
 - Designed database schema and optimized queries
-

CHIEF – Emergency Auto Alert System

Tech: PHP, MySQL, Android API Integration

- Built backend APIs for real-time emergency alerts
 - Implemented OTP verification and SMS/email alerts
 - Managed multi-admin dashboards and service modules
 - Focused on security and fast response handling
-

Virtual Marketplace (E-commerce System)

Tech: PHP, MySQL

- Developed product upload, cart, and order placement system
- Built admin approval and order management panel
- Created secure checkout and session-based cart

Login & Signup Authentication System

Tech: PHP, MySQL

- Secure user registration & login
- Password reset via email OTP
- Session-based authentication & validation

INTERNSHIP / PRACTICAL EXPERIENCE

Backend Development – Self Projects & Practice

- Built multiple real-world PHP projects
- Practiced database normalization and query optimization
- Worked on role-based access (Admin / User)

SOFT SKILLS

- Problem Solving
- Logical Thinking
- Debugging
- Team Collaboration
- Time Management

CAREER OBJECTIVE

To secure a **Backend Developer** position where I can apply my PHP & database skills to build secure, scalable applications while continuously learning modern backend technologies.

DECLARATION

I hereby declare that the above information is true to the best of my knowledge.
